- 1** [Sensitivity of integrated voice and data networks to traffic and design variables](#)

I. Gitman, B. Occhiogrosso, W. Hsieh

November 1979 **Proceedings of the sixth symposium on Data communications SIGCOMM '79**

Publisher: ACM Press

Full text available: pdf(1.06 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This paper presents quantitative results of cost/performance studies of circuit-switching, packet-switching, and hybrid (circuit/packet) switching technologies. The results expose the cost difference for alternative realizations and usage of a given network technology.

- 2** [vic: a flexible framework for packet video](#)

I. Gitman, B. Occhiogrosso, W. Hsieh

January 1995 **Proceedings of the third ACM international conference on Multimedia MULTIMEDIA '95**

Publisher: ACM Press

Full text available: html(67.64 KB)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

**Keywords:** conferencing protocols, digital video, image and video compression and processing, multicasting, networking and communication

- 3** [Methods for encrypting and decrypting MPEG video data efficiently](#)

Lei Tang

February 1997 **Proceedings of the fourth ACM international conference on Multimedia MULTIMEDIA '96**

Publisher: ACM Press

Full text available: pdf(1.45 MB)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

**Keywords:** MPEG codec, compression, multimedia commerce, multimedia encryption, multimedia security

**4 Applying cryptographic techniques to problems in media space security**

 Ian E. Smith, Scott E. Hudson, Elizabeth D. Mynatt, John R. Selbie  
August 1995 **Proceedings of conference on Organizational computing systems COCS '95**

**Publisher:** ACM Press

Full text available:  pdf(967.50 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Media spaces integrate audio, video, and computing systems for the purpose of remote collaboration and awareness, frequently between people engaged in a cooperative task. Technological advances have made these systems feasible using desktop computers and broadband, digital networks. Using a media space over a shared network requires that numerous security and privacy issues be addressed. One advantage of digital media spaces is that properties of the media space can be manipulated so that u ...

**5 The Jupiter audio/video architecture: secure multimedia in network places**

 Pavel Curtis, Michael Dixon, Ron Frederick, David A. Nichols  
January 1995 **Proceedings of the third ACM international conference on Multimedia MULTIMEDIA '95**

**6 Copy detection mechanisms for digital documents**

 Sergey Brin, James Davis, Héctor García-Molina  
May 1995 **ACM SIGMOD Record , Proceedings of the 1995 ACM SIGMOD international conference on Management of data SIGMOD '95**, Volume 24 Issue 2

**Publisher:** ACM Press

Full text available:  pdf(1.51 MB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In a digital library system, documents are available in digital form and therefore are more easily copied and their copyrights are more easily violated. This is a very serious problem, as it discourages owners of valuable information from sharing it with authorized users. There are two main philosophies for addressing this problem: prevention and detection. The former actually makes unauthorized use of documents difficult or impossible while the latter makes it easier to discover such activity. I ...

**7 Application of splay trees to data compression**

 D. W. Jones  
August 1988 **Communications of the ACM**, Volume 31 Issue 8

**Publisher:** ACM Press

Full text available:  pdf(1.22 MB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The splay-prefix algorithm is one of the simplest and fastest adaptive data compression algorithms based on the use of a prefix code. The data structures used in the splay-prefix algorithm can also be applied to arithmetic data compression. Applications of these algorithms to encryption and image processing are suggested.

Additional Information: full citation, abstract, references, citings, index terms, review

Indexing file contents is a powerful means of helping users locate documents, software, and other types of data among large repositories. In environments that contain many different types of data, content indexing requires type-specific processing to extract

information effectively. We present a model for type-specific, user-customizable information extraction, and a system implementation called Essence. This software structure allows users to associate specialized extracti ...

**19 Building a scalable and accurate copy detection mechanism**

Narayanan Shivakumar, Hector Garcia-Molina  
April 1996 **Proceedings of the first ACM international conference on Digital libraries DL '96**

**Publisher:** ACM Press

Full text available: pdf(921.24 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [cited by](#), [index terms](#)

Often, publishers are reluctant to offer valuable digital documents on the Internet for fear that they will be re-transmitted or copied widely. A Copy Detection Mechanism can help identify such copying. For example, publishers may register their documents with a copy detection server, and the server can then automatically check public sources such as UseNet articles and Web sites for potential illegal copies. The server can search for exact copies, and also for cases where significant po ...

**20 A framework for constructing features and models for intrusion detection systems**

Wenke Lee, Salvatore J. Stolfo

November 2000 **ACM Transactions on Information and System Security (TISSEC)**,  
Volume 3 Issue 4

**Publisher:** ACM Press

Full text available: pdf(187.03 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

Intrusion detection (ID) is an important component of infrastructure protection mechanisms. Intrusion detection systems (IDSs) need to be accurate, adaptive, and extensible. Given these requirements and the complexities of today's network environments, we need a more systematic and automated IDS development process rather than the pure knowledge encoding and engineering approaches. This article describes a novel framework, MADAM ID, for Mining Audit Data for Automated Models for Intrusion ...

**Keywords:** data mining, feature construction, intrusion detection
